Subject Index

Acetic acid
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Adenine, caffeine, methyl anthranilate, L-phenylalanine, salicyl alcohol, vanillin
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197
Adsorption
Experimental study of retrograde adsorption in supercritical fluids 25
Amoxicillin
Process parameters and morphology in amoxicillin micro and submicro particles generation by supercritical antisolvent precipitation 239
Antisolvent
Gas antisolvent crystallization of organic salts from aqueous solutions 249
Aqueous mixtures
Gas antisolvent crystallization of organic salts from aqueous solutions 249
Aqueous wastes
An alternative method of oxidizing aqueous waste in supercritical water: oxygen supply by means of electrolysis 227

Batch experiments
Hydrothermal gasification of biomass and organic wastes 145
Binary high-pressure vapor–liquid equilibrium
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Biomass
Hydrothermal gasification of biomass and organic wastes 145
Blends
Polymer modification by supercritical impregnation 65

Carbon dioxide
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Supercritical carbon dioxide extraction of metals from aqueous solutions: a review 259
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81
Carbon dioxide + water + 1-propanol
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197
Chromatography
Experimental study of retrograde adsorption in supercritical fluids 25
CO_2
Tautomerism of an indoline spiropyran in compressed CO_2-ethanol mixtures 171
Contact angle
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81
Coriander seed
Extraction of coriander seed oil by CO_2 and propane at super- and subcritical conditions 177
Correlation
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197
Countercurrent extraction
Separation of fish oil ethyl esters with supercritical carbon dioxide 55
Crystallization
Gas antisolvent crystallization of organic salts from aqueous solutions 249

Data
Experimental study of retrograde adsorption in supercritical fluids 25
Diffusion
Diffusion of disperse dyes in PET films during impregnation with a supercritical fluid 187
Diffusion coefficient
Using supercritical fluid chromatography to determine diffusion coefficients of lipids in supercritical CO_2 35
Dimerization of acetic acid
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Dimethylsulfoxide
Process parameters and morphology in amoxicillin micro and submicro particles generation by supercritical antisolvent precipitation 239
Diphenylether
Hydrolysis of diphenylether in supercritical water: Effects of dissolved NaCl 215
Disperse dyestuff
Diffusion of disperse dyes in PET films during impregnation with a supercritical fluid 187
D,L-α-Tocopherol
The synthesis of D,L-α-tocopherol in supercritical media 135
Dynamics
Experimental study of retrograde adsorption in supercritical fluids 25

Essential oils
Extraction of coriander seed oil by CO_2 and propane at super- and subcritical conditions 177
Ethanol
Tautomerism of an indoline spiropyran in compressed CO_2-ethanol mixtures 171
Experimental data
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197

Extraction
Supercritical carbon dioxide extraction of metals from aqueous solutions: a review 259

Fatty acid ethyl esters
Separation of fish oil ethyl esters with supercritical carbon dioxide 55
Fatty acids
Extraction of coriander seed oil by CO_2 and propane at super- and subcritical conditions 177
Film roll method
Diffusion of disperse dyes in PET films during impregnation with a supercritical fluid 187
Flow reactor
Hydrothermal gasification of biomass and organic wastes 145
Fluorinated thiols
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81

Gas–antisolvent process
Volume expansion in relation to the gas–antisolvent process 13
Gasification
Hydrothermal gasification of biomass and organic wastes 145
Gas Solubility
Measurement and modelling of high-pressure phase equilibria in the systems polyethyleneglycol (PEG)–propane, PEG–nitrogen and PEG–carbon dioxide 1
Gel microspheres
Synthesis of phenolic/furfural gel microspheres in supercritical CO_2 73
Gold
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81

High Pressure
Measurement and modelling of high-pressure phase equilibria in the systems polyethyleneglycol (PEG)–propane, PEG–nitrogen and PEG–carbon dioxide 1
High pressure electrolysis
An alternative method of oxidizing aqueous waste in supercritical water: oxygen supply by means of electrolysis 227
High-pressure multi-phase vapour–liquid–liquid equilibrium
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197
Hydrothermal oxidation
Hydrothermal oxidation of a nitrogen-containing compound: the fenuron 45

Impregnation
Polymer modification by supercritical impregnation 65

Kinetics
Hydrolysis of diphenylether in supercritical water: Effects of dissolved NaCl 215
Oxidation kinetics for methane/methanol mixtures in supercritical water 155
The synthesis of D,L-α-tocopherol in supercritical media 135

Lipids
Using supercritical fluid chromatography to determine diffusion coefficients of lipids in supercritical CO_2 35
Lobenzarit
Gas antisolvent crystallization of organic salts from aqueous solutions 249

Mechanism
Hydrolysis of diphenylether in supercritical water: Effects of dissolved NaCl 215
Mechanisms
Oxidation kinetics for methane/methanol mixtures in supercritical water 155
Metal
Supercritical carbon dioxide extraction of metals from aqueous solutions: a review 259
Methanol
Gas antisolvent crystallization of organic salts from aqueous solutions 249
Minerals
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81
Mixtures
Oxidation kinetics for methane/methanol mixtures in supercritical water 155
Modeling
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Oxidation kinetics for methane/methanol mixtures in supercritical water 155
Modelling
Measurement and modelling of high-pressure phase equilibria in the systems polyethyleneglycol (PEG)–propane, PEG–nitrogen and PEG–carbon dioxide 1
Modification
Polymer modification by supercritical impregnation 65
Multi-component simulation
Separation of fish oil ethyl esters with supercritical carbon dioxide 55

Nitrogen conversion
Hydrothermal oxidation of a nitrogen-containing compound: the fenuron 45
Nitrogenous compound
Hydrothermal oxidation of a nitrogen-containing compound: the fenuron 45
Number of theoretical plates
Separation of fish oil ethyl esters with supercritical carbon dioxide 55

Oxidation
Oxidation kinetics for methane/methanol mixtures in supercritical water 155

Particle size
Synthesis of phenolic/furfural gel microspheres in supercritical CO_2 73
Partitioning of biomolecules
Partitioning of some biomolecules at high pressures to aqueous/organic liquid–liquid phases of the carbon dioxide + water + 1-propanol system 197
PET film
Diffusion of disperse dyes in PET films during impregnation with a supercritical fluid 187
Phenolic/furfural
Synthesis of phenolic/furfural gel microspheres in supercritical CO_2 73
Photochromism
Tautomerism of an indoline spiropyran in compressed CO_2-ethanol mixtures 171
Polarity
Tautomerism of an indoline spiropyran in compressed CO_2-ethanol mixtures 171

Polyethyleneglycol
Measurement and modelling of high-pressure phase equilibria in the systems polyethyleneglycol (PEG)–propane, PEG–nitrogen and PEG–carbon dioxide 1
Polymers
Polymer modification by supercritical impregnation 65
PVC
Polymer modification by supercritical impregnation 65

Reaction in supercritical media
The synthesis of D,L-α-tocopherol in supercritical media 135
Reactive pathway
Hydrothermal oxidation of a nitrogen-containing compound: the fenuron 45

SAFT-EOS
Measurement and modelling of high-pressure phase equilibria in the systems polyethyleneglycol (PEG)–propane, PEG–nitrogen and PEG–carbon dioxide 1
Sodium chloride
Hydrolysis of diphenylether in supercritical water: Effects of dissolved NaCl 215
Soil extracts
An alternative method of oxidizing aqueous waste in supercritical water: oxygen supply by means of electrolysis 227
Sol–emulsion–gel technique
Synthesis of phenolic/furfural gel microspheres in supercritical CO_2 73
Solid–liquid–vapor equilibria
Volume expansion in relation to the gas–antisolvent process 13
Solid mixture
Solubilities of solid mixtures in supercritical carbon dioxide: a review 111
Solubility
Gas antisolvent crystallization of organic salts from aqueous solutions 249
Solubilities of solid mixtures in supercritical carbon dioxide: a review 111
Spiropyran
Tautomerism of an indoline spiropyran in compressed CO_2-ethanol mixtures 171
Supercritical
Supercritical carbon dioxide extraction of metals from aqueous solutions: a review 259
Supercritical antisolvent precipitation
Process parameters and morphology in amoxicillin micro and submicro particles generation by supercritical antisolvent precipitation 239
Supercritical carbon dioxide
Polymer modification by supercritical impregnation 65
Supercritical CO_2
Separation of fish oil ethyl esters with supercritical carbon dioxide 55
Synthesis of phenolic/furfural gel microspheres in supercritical CO_2 73
Supercritical crystallization
Volume expansion in relation to the gas–antisolvent process 13
Supercritical extraction
Extraction of coriander seed oil by CO_2 and propane at super- and subcritical conditions 177
Supercritical fluid chromatography
Using supercritical fluid chromatography to determine diffusion coefficients of lipids in supercritical CO_2 35
Supercritical fluid extraction
Solubilities of solid mixtures in supercritical carbon dioxide: a review 111
Supercritical fluids
Experimental study of retrograde adsorption in supercritical fluids 25
Gas antisolvent crystallization of organic salts from aqueous solutions 249
Supercritical impregnation
Diffusion of disperse dyes in PET films during impregnation with a supercritical fluid 187
Supercritical water
Hydrolysis of diphenylether in supercritical water: Effects of dissolved NaCl 215
Hydrothermal gasification of biomass and organic wastes 145
Oxidation kinetics for methane/methanol mixtures in supercritical water 155
Supercritical water oxidation
An alternative method of oxidizing aqueous waste in supercritical water: oxygen supply by means of electrolysis 227

Taylor–Aris peak technique
Using supercritical fluid chromatography to determine diffusion coefficients of lipids in supercritical CO_2 35
Tocopherols
Extraction of coriander seed oil by CO_2 and propane at super- and subcritical conditions 177

Volume expansion
Volume expansion in relation to the gas–antisolvent process 13

Waste
Hydrothermal gasification of biomass and organic wastes 145
Wastewater treatment
Hydrothermal oxidation of a nitrogen-containing compound: the fenuron 45
Water
High-pressure (vapor + liquid) equilibrium in binary mixtures of (carbon dioxide + water or acetic acid) at temperatures from 313 to 353 K 97
Wettability
The recovery of fine gold particles from a slurry of minerals using liquid carbon dioxide 81
